

What is your role?

The Front End Developer primarily participates in designing and implementing new services as well as participates in customer delivery. It will be possible to influence your work profile based on your interests.

While not mandatory, a generic understanding of user interfaces and being able to position oneself as an end-user is highly desirable. We also appreciate prior knowledge of the Image Processing domain.

We are looking for well-rounded people who care about their craft and understand software development. While we value a formal degree in computer science we do not require one - a candidate with a strong background, open mind and ability to learn would be an ideal addition to our team.

That being said, here is what we think the ideal team member would be:

What is expected from you?

- Good experience on Angular 2+:
- Extensive experience in at least one modern JavaScript MV-VM/MVC frameworks (Angular2+, JQuery)
- Strong expertise with HTML, CSS, and writing cross-browser compatible code.
- Good understanding of AJAX and JavaScript Dom manipulation Techniques
- Experience in JavaScript libraries [ES6].
- Experience in TypeScript.
- Experience with complex Angular2+ modules, components, services, and dependency injections
- Good experience in the Integration of REST APIs.

What are your responsibilities:

- Develop user interfaces with the latest frontend technologies
- Research, analyze, and develop product features of an increasingly complex nature
- Code tested and documented JavaScript, HTML, CSS.
- Make design and technical decisions for Angular projects.

Qualification:

Engineering from CSE/IT

Experience:

- 2–3 years

TechStack Required:

Javascript
HTML/CSS
JQuery
Angular (2+)
