

What is your role?

The UI/UX Developer primarily involves himself/herself in designing & structuring product aesthetics for our enterprise user. A sharp understanding of user profile and acumen on enterprise cloud products is an essential skill that we seek. It will be possible to influence your work profile based on your interests.

While not mandatory, a generic understanding of user interfaces and being able to position oneself as an end-user is highly desirable. We also appreciate prior knowledge of the Image Processing domain.

We are looking for well-rounded people who care about their craft and understand software development. While we value a formal degree in computer science we do not require one - a candidate with a strong background, open mind and ability to learn would be an ideal addition to our team.

That being said, here is what we think the ideal team member would be:

Responsibilities

- Understand product specifications and user psychology
- Conduct concept and usability testing and gather feedback
- Create personas through user research and data
- Define the right interaction model and evaluate its success
- Develop wireframes and prototypes around customer needs
- Find creative ways to solve UX problems (e.g. usability, findability)
- Should need to understand and implement the latest style libraries on the frontend
- Communicate design ideas and prototypes to developers
- Convert the design ideas to code
- Understanding of HTML, CSS and JavaScript is must

Requirements

- Good experience as a UX Designer, UI Designer, and Frontend developer
- Background in project management and research
- Familiarity with interaction design and information architecture
- Knowledge of Bootstrap 4, Material design and other latest libraries
- Knowledge of HTML5/CSS; JavaScript is a must.
- Understanding of any Front End Framework is a plus

Qualification:

- Engineering from CSE/IT

Experience:

- 3–5 years

TechStack Required:

- Javascript
- HTML/CSS
- JQuery
- Angular (2+)
